Open to: Internship | Full-Time | Immediate Joiner | Relocation Across India

PROFESSIONAL SUMMARY

Backend-focused Java Full Stack Developer with hands-on experience designing and shipping production-grade REST APIs, scalable backend systems, and fully Dockerized cloud-deployed applications. Proficient in Spring Boot, Spring Security, JWT, PostgreSQL, JPA/Hibernate, Docker, and Nginx. Demonstrated end-to-end ownership — database schema design → REST API development → frontend integration → containerization → CI/CD → production monitoring. Achieved 99.61 percentile in MAH MCA CET 2026. Actively deepening expertise in microservices, Apache Kafka, Kubernetes, and AWS.

TECHNICAL SKILLS

Languages:	Java · JavaScript · TypeScript · SQL · PHP · HTML5 · CSS3
Backend:	Spring Boot · Spring MVC · Spring Security · Spring Data JPA · Hibernate · REST API Design JWT · RBAC · Microservices (Learning)
Frontend:	React.js · Next.js · Tailwind CSS · Framer Motion · JSP / Servlets
Databases:	PostgreSQL · MySQL · MongoDB
DevOps & Cloud:	Docker · Docker Compose · Nginx · GitHub Actions CI/CD · AWS EC2 · Railway PaaS · Kubernetes (Learning)
Tools:	Git · GitHub · Maven · Postman · IntelliJ IDEA · VS Code
Concepts:	OOP · Multithreading · Collections · MVC Architecture · REST Architecture · SDLC

PROJECTS

AeroSphere — Airline Booking & Management System

Feb 2026 – Present

Stack : Java 11 · JSP/Servlets · Apache Tomcat 9 · MySQL 8 · Nginx · Docker · Maven · AWS EC2 |

Live Demo : aerosphere.work.gd | *GitRepo :* github.com/ajaypatil-8/aerosphere-airline-management-system

- Built a production-grade airline booking platform with multi-role authentication (Admin / User), real-time seat availability, flight search & filtering, booking management, and Razorpay payment gateway — fully deployed on AWS EC2 with a production MySQL database.
- Provisioned and configured an AWS EC2 t3.small instance with Elastic IP, Security Groups for HTTP/HTTPS/SSH, and migrated from Railway PaaS to a self-managed cloud environment for full infrastructure control.
- Dockerized full 3-service stack (Tomcat + MySQL + Nginx) using multi-stage Maven build; orchestrated via Docker Compose with health checks, named volumes, and service dependency ordering.
- Configured Nginx reverse proxy with SSL/HTTPS via Let's Encrypt, HTTP→HTTPS redirect, login rate limiting (5 req/min per IP), gzip compression, 30-day static asset caching, and security headers (HSTS, X-Frame-Options, X-Content-Type-Options).
- Established GitHub Actions CI/CD pipeline — Maven build and Docker image rebuild triggered on every git push; 100% production uptime monitored via UptimeRobot.

CrowdSpark — Full Stack Crowdfunding Platform (Spring Boot)

Jan 2026 – Ongoing

Spring Boot · Spring Security · JWT · PostgreSQL · Next.js · Docker |

GitHub: github.com/ajaypatil-8/Crowdspark-Backend

- Architected 15+ RESTful API endpoints following the Controller-Service-Repository pattern; designed for future horizontal scaling and microservices transition.
- Implemented stateless JWT authentication with Spring Security and RBAC, enforcing fine-grained role-level access control across all secured endpoints.
- Optimized PostgreSQL data access via JPA/Hibernate with lazy loading and query tuning, reducing redundant database calls by ~40%; containerized full stack using Docker Compose.

CrowdSpark — Production Crowdfunding Platform (PHP / MySQL)

Jan 2026 · Deployed

PHP · MySQL · JavaScript · Cloudinary · PHPMailer |

Live: crowdspark-x.infinityfreeapp.com | GitHub: github.com/ajaypatil-8/College-Major-Project-php

- Delivered a production crowdfunding platform with multi-role authentication (Admin, Campaigner, Donor), campaign management, donation engine, and admin panel across 10+ backend modules.
- Integrated Cloudinary for cloud-based image storage and PHPMailer/SMTP for automated transactional email notifications on donations and campaign status updates.

3D Developer Portfolio

Live

Next.js · React · Tailwind CSS · Framer Motion · React Three Fiber |

Live: ajaypatil-portfolio.vercel.app | GitHub: github.com/ajaypatil-8/3d-portfolio

- Built an animated 3D interactive portfolio using React Three Fiber and Framer Motion; features smooth scroll-triggered animations, 3D scene transitions, and fully responsive layout.
- Leveraged Next.js SSR and SSG for fast initial load and SEO optimization; high Lighthouse performance scores — deployed on Vercel with zero-config CI/CD on every git push.

EXPERIENCE

Java Full Stack Developer — Independent Engineering Projects

April 2025 – Present

- Independently architected and delivered multiple full-stack applications from requirements to production deployment, applying software engineering best practices across the entire SDLC.
- Demonstrated end-to-end ownership: database schema design → REST API development → frontend integration → containerization with Docker → cloud deployment → production monitoring.
- Engineered secure, role-based REST APIs with Spring Security, JWT, and RBAC; automated deployments via GitHub Actions CI/CD; configured Nginx reverse proxy and production environment variables.

CERTIFICATIONS

Problem Solving (Intermediate)

Jun 2026

HackerRank · Credential ID: 37D0BCDE6D7D

SQL (Advanced)

Jun 2026

HackerRank · Credential ID: BE11FA01537A

Java (Basic)

Jun 2026

HackerRank · Credential ID: BDC93FD670D3

Software Engineer Intern

Jun 2026

HackerRank · Credential ID: BF64E8C851F0

EDUCATION

Bachelor of Computer Applications (BCA) — Final Year

Expected June 2026

Arts, Commerce and Science College, Palus · Shivaji University, Kolhapur · CGPA: 7.6 / 10

CURRENTLY EXPLORING

Apache Kafka (event-driven architecture) · Kubernetes (container orchestration) · AWS (EC2, S3, IAM, RDS) · Spring Cloud / Microservices · CI/CD automation via GitHub Actions
