PROJECTS

CrowdSpark – Full Stack Crowdfunding Platform (Spring Boot) *Jan 2026 – Ongoing*
Stack: Spring Boot • Spring Security • JWT • PostgreSQL • Next.js • Docker | github.com/ajaypatil-8/Crowdspark-Backend

- Architected 15+ RESTful API endpoints using Controller-Service-Repository pattern; designed for scalability and future transition to microservices architecture.
- Implemented stateless JWT authentication with Spring Security and RBAC, enforcing role-level access control across all secured endpoints.
- Optimized PostgreSQL data access via JPA/Hibernate (lazy loading + query tuning), reducing redundant DB calls by ~40%; containerized stack with Docker Compose.

CrowdSpark – Production Crowdfunding Platform (PHP/MySQL) *2026 jan — Deployed*
Stack: PHP • MySQL • JavaScript • Cloudinary • PHPMailer | crowdspark-x.infinityfreeapp.com | github.com/ajaypatil-8/College-Major-Project-php-

- Delivered a production crowdfunding platform with multi-role auth (3 roles), campaign management, donation engine, and admin panel across 10+ backend modules.
- Integrated Cloudinary for image storage and PHPMailer/SMTP for automated transactional email notifications.

3D Developer Portfolio *Live*
Stack: Next.js • React • Tailwind CSS • Framer Motion | ajaypatil-portfolio.vercel.app | github.com/ajaypatil-8/3d-portfolio

- Built an animated 3D portfolio leveraging Next.js SSR/SSG for optimized load performance and improved Lighthouse scores — deployed on Vercel.

Haryali Hub – E-Commerce Plant Store *Completed*
Stack: HTML • CSS • JavaScript • PHP • MySQL | github.com/ajaypatil-8

- Built a multi-page e-commerce app with session-based auth, CRUD product management, and MySQL backend.

EXPERIENCE

Java Full Stack Developer — Independent Engineering Projects *april 2025 – Present*

- Independently architected and delivered full-stack applications from requirements to deployment, applying backend engineering best practices across the entire SDLC.
- Engineered secure REST APIs with Spring Security, JWT, and RBAC; containerized services with Docker and deployed on cloud infrastructure.
