Ajay Patil

Java Full Stack Developer · Spring Boot · React / Next.js · Docker · Cloud Deployment

Palus, Sangli, Maharashtra · +91-7906066648 · ajaypatil8eight@gmail.com · linkedin.com/in/ajaypatil-8eight · github.com/ajaypatil-8 · ajaypatil-portfolio.vercel.app

Open to: Internship | Full-Time | Immediate Joiner | Relocation Across India

PROFESSIONAL SUMMARY

Backend-focused Java Full Stack Developer with hands-on experience designing and shipping production-grade REST APIs, scalable backend systems, and fully Dockerized cloud-deployed applications. Proficient in Spring Boot, Spring Security, JWT, PostgreSQL, JPA/Hibernate, Docker, and Nginx. Experienced in end-to-end ownership — from database design and API development through containerization, CI/CD pipelines, and production monitoring. Actively deepening expertise in microservices, Apache Kafka, Kubernetes, and AWS.

TECHNICAL SKILLS

Languages	Java · JavaScript · SQL
Backend	Spring Boot · Spring MVC · Spring Security · Spring Data JPA · Hibernate · REST API Design · JWT · RBAC · Microservices (Learning)
Frontend	React.js · Next.js · Tailwind CSS · Framer Motion · JSP / Servlets · HTML5 · CSS3
Databases	PostgreSQL · MySQL · MongoDB
DevOps & Cloud	Docker · Docker Compose · Nginx · Apache Tomcat 9 · Railway PaaS · GitHub Actions CI/CD · AWS EC2 (Basics) · Kubernetes (Learning)
Tools	Git · GitHub · Maven · Postman · IntelliJ IDEA · VS Code · NetBeans
Concepts	OOP · Multithreading · Collections · MVC Architecture · REST Architecture · SDLC

PROJECTS

AeroSphere — Airline Booking & Management System *Deployed · Live*

Stack: Java 11 · JSP/Servlets · Apache Tomcat 9 · MySQL 8 · Nginx · Docker · Maven · AWS EC2 |

Live Demo : aerosphere.work.gd | **GIthubRepo :** github.com/ajaypatil-8/aerosphere-airline-management-system

- Built a production-grade airline booking platform with multi-role authentication (Admin / User), real-time seat availability, flight search and filtering, booking management, and Razorpay payment gateway integration — deployed end-to-end on AWS EC2 with a production MySQL database.
- Provisioned and configured an AWS EC2 t3.small instance; allocated an Elastic IP for a stable public endpoint, set up Security Groups for HTTP/HTTPS/SSH access, and migrated from Railway PaaS to a self-managed cloud environment for full infrastructure control.
- Dockerized full 3-service stack (Tomcat + MySQL + Nginx) using a multi-stage Maven build into a minimal Tomcat runtime image; orchestrated via Docker Compose with health checks, named volumes, and service dependency ordering.
- Configured Nginx reverse proxy with SSL/HTTPS via Let's Encrypt (certbot), automatic HTTP→HTTPS redirect, login rate limiting (5 req/min per IP), gzip compression, 30-day static asset caching, and security headers (HSTS, X-Frame-Options, X-Content-Type-Options); pointed custom domain aerosphere.work.gd via DNS A records.
- Established GitHub Actions CI/CD pipeline — Maven build and Docker image rebuild triggered automatically on every git push; production uptime monitored via UptimeRobot (100% uptime).

CrowdSpark — Full Stack Crowdfunding Platform (Spring Boot) *Jan 2026 – Ongoing*

Stack: Spring Boot · Spring Security · JWT · PostgreSQL · Next.js · Docker | **GIthubRepo :** github.com/ajaypatil-8/Crowdspark-Backend

- Architected 15+ RESTful API endpoints following the Controller-Service-Repository pattern; designed for future horizontal scaling and transition to microservices architecture.
- Implemented stateless JWT authentication with Spring Security and RBAC, enforcing fine-grained role-level access control across all secured endpoints.
- Optimized PostgreSQL data access via JPA/Hibernate with lazy loading and query tuning, reducing redundant database calls by approximately 40%; containerized full stack using Docker Compose.

CrowdSpark — Production Crowdfunding Platform (PHP / MySQL) *Jan 2026 · Deployed*

Stack: PHP · MySQL · JavaScript · Cloudinary · PHPMailer |

Live Demo : crowdspark-x.infinityfreeapp.com | **GIthubRepo :** github.com/ajaypatil-8/College-Major-Project-php-

- Delivered a production crowdfunding platform with multi-role authentication (Admin, Campaigner, Donor), campaign management, a donation engine, and an admin panel across 10+ backend modules.
- Integrated Cloudinary for cloud-based image storage and PHPMailer/SMTP for automated transactional email notifications on donations and campaign status updates.

3D Developer Portfolio *Live*

Stack: Next.js · React · Tailwind CSS · Framer Motion |

Live Demo : ajaypatil-portfolio.vercel.app | **GIthubRepo :** github.com/ajaypatil-8/3d-portfolio

- Built an animated 3D interactive portfolio using React Three Fiber and Framer Motion; features smooth scroll-triggered animations, 3D scene transitions, and a responsive layout across all screen sizes.
- Leveraged Next.js SSR and SSG for fast initial load and SEO optimization; achieved high Lighthouse performance scores — deployed on Vercel with zero-config CI/CD on every git push.
- Structured with reusable React component architecture; Tailwind CSS utility-first styling for consistent design system; showcases projects, skills, and contact sections with polished UX.

EXPERIENCE

Java Full Stack Developer — Independent Engineering Projects *April 2025 – Present*

- Independently architected and delivered multiple full-stack applications from requirements to production deployment, applying software engineering best practices across the entire development lifecycle.
- Demonstrated end-to-end ownership: database schema design → REST API development → frontend integration → containerization with Docker → cloud deployment → production monitoring.
- Engineered secure, role-based REST APIs with Spring Security, JWT, and RBAC; automated deployments via GitHub Actions CI/CD; configured Nginx reverse proxy and production environment variables.

EDUCATION

Bachelor of Computer Applications (BCA) — Final Year *Expected June 2026*

Arts, Commerce and Science College, Palus · Shivaji University, Kolhapur · CGPA: **7.2 / 10**

CURRENTLY EXPLORING

Apache Kafka (event-driven architecture) · **Kubernetes** (container orchestration) · **AWS** (EC2, S3, IAM, RDS) · **Spring Cloud / Microservices** · CI/CD automation via GitHub Actions
